DETAILED ACTION

1. Claims 1-5, 7-13, 15-29, 31, 32, and 34-48 are pending in this communication filed 07/05/04 as Amendment and Request for Reconsideration after Final Rejection.
2. The finality of the prior Office Action is hereby withdrawn in view of the reconsideration of Applicants' arguments in view of the new ground(s) of rejection as set forth here below.
3. Applicants' are respectfully requested to note the Examiner prosecuting the application has changed. All future correspondence should be addressed to Examiner Colbert, Art Unit 3624.

Specification

4. The abstract of the disclosure is objected to because the abstract contains more than 150 words.

Content of Specification

- (j) Abstract of the Disclosure: See MPEP § 608.01(f). A brief narrative of the disclosure as a whole in a single paragraph of 150 words or less commencing on a separate sheet following the claims. In an international application which has entered the national stage (37 CFR 1.491(b)), the applicant need not submit an abstract commencing on a separate sheet if an abstract was published with the international application under PCT Article 21. The abstract that appears on the cover page of the pamphlet published by the International Bureau (IB) of the World Intellectual Property Organization (WIPO) is the abstract that will be used by the USPTO. See MPEP § 1893.03(e).

Correction is required. See MPEP § 608.01(b).

Election/Restrictions

5. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Art Unit: 3624

- I. Claims 1-5, 7-13, 15-25 and 42-48, drawn to a charge number issuing system, classified in class 705, subclass 44.
 - II. Claims 26-29, 31, 32, and 34-41, drawn to a transaction system for authorizing valid charge numbers, classified in class 705, subclass 26.
6. Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as storing, charge number issuing system. Group II has separate utility such as a transaction system for authorizing valid charge numbers. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicants' are reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 3624

remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37CFR 1.17 (I).

If Applicants' should elect claims 26-32 and 34-41, they are respectfully requested to revise the preamble of Claim 26 to the following: "A charge number transaction system for authorizing valid charge numbers via an electronic network, comprising:" or "A transaction charge number system for authorizing valid charge numbers via an electronic communication network, comprising:". The preamble and the claims appear not to be in agreement because the body of the claim references a "transaction system".
